WOLFRAM TEAM:

Adrian Smith

Adrian has been at Wolfram for over ten years where he works in partnerships with schools, universities, government agencies and commercial organisations to introduce innovative new educational initiatives. His educational technology experience spans four decades and embraces domains from disaster preparedness and management in Africa to digital healthcare delivery at national scales to the impact of new connectivity solutions via satellite and 5G networks. Adrian has been CEO of a high-tech space applications company and has held managing director and CXO roles in multinational corporations as well as driving entrepreneurial start-up businesses. He confesses to having taught mathematics at University level and has tutored high school students but many years ago. In addition to his education roles, Adrian works inside the UK's National Health Service to deliver new, digital care pathways.

WOLFRAM TEAM:

Alec Titterton

Alec Titterton works for Wolfram Research as the content development manager for computerbasedmath.org, responsible for taking the vision for a problem-solving, computer-based, computational-thinking curriculum and turning it into ready-to-use learning resources and activities. Alec was previously the national coordinator for Mathematics and Computing specialist schools in the UK, drawing on his experience gained from teaching in secondary schools for 16 years. Alec holds a degree in Electronic and Computer Engineering from Birmingham and a PGCE from Cambridge University.

Lianne Hart

Lianne Hart-Lincoln, Director of Strategic Project Delivery, leads on all strategic projects for Wolfram developing innovative, world leading solutions in the Education and workplace learning space.

Phil Whitehead

Phil Whitehead is an education and arts consultant and has been the director of his own consultancy company, Phil Whitehead Ltd, Phil has set up and led funded research programmes for staff at The British School of Caracas, the International School of Paris, and Oak House School, Barcelona.

He has continued to work on a long term basis for over 15 years with DSB International School in Mumbai, advising them on research, staff appointments and school development.

Nina Martin

Panelist- Preparing for an Unknown Future

Nina has a Bachelor Degree in Industrial Engineering from Stanford University and a PGCE from the University of Sunderland, with a focus in teaching mathematics to students in key stages 3 and 4 (IB grades 6-10 or ages 12-16). She has always loved mathematics and helping children to learn, and at the same time, always volunteered in her children's schools.

It was when she began to get involved in the parent research program that Phil Whitehead ran at the International School of Florence as Director of Research and Learning that she was inspired to pursue a degree in teaching. provided. Nina is now busily engaged as a private tutor of mathematics to students enrolled in MYP and IB studies in Florence, Italy.
